

## Right Reporter® Infrastructure

Designed for professional software developers, Avman's Infrastructure tools provide a range of features to suit individual needs.

### > Right Reporter Infra-Right

Infra-Right contains the basic building blocks to quickly build any reporting application.

The basic building blocks include several high-productivity JSP tags such as the Report Tag which allows developers to embed any complex report within specific applications by utilizing a simple tag. Infra-Right is to be used in conjunction with a JSP Engine such as the Jakarta-Tomcat or J2EE environments such as WebSphere or WebMethods.

### > Right Reporter Portlet

Reporting Portlet includes the Infra-Right and a JSR# 168 compliant Portlet Interface. This allows software developers to include Right Reporter reports into any portal software such as Vignette. Right Reporter also bundles Apache Corp.'s JetSpeed portal software as a tool for basic development requirements.

Reporting Portlet requires the Right Reporter software to be pre-installed. It can also co exist with the Right Reporter J2EE version.

### > Right Reporter J2EE

Right Reporter J2EE is the Right Reporter – Enterprise Version customized to a specific meta-database. It is deployed using the standard deployment tools of any J2EE Engine. One such port on WebSphere supports over 100,000 users.

### Right Reporter Infra-Right

- > Includes Right Reporter features, plus:
- > Fast development tools to develop web based applications

### Right Reporter Portlet

- > Includes Right Reporter Infra-Structure, plus:
- > JSR#168 compliant Portlet interface for your choice of portal software (Web Logic Portal, WebSphere Portal, Vignette)

### Right Reporter J2EE

- > Right Reporter customized to fit into your choice of J2EE Engine (WebLogic, WebSphere, iPlanet)

```
<html>
<h1 lang="en" prefix="R#" uri="RReport.tld" >
<h2>Simple demo-ch1
</h2>
<p>Are these the lines of code you want to write?
<p> or do you want to write a few hundred lines to do the same
<table>
<tr>
<td><span><R:report metaSource="rptdb" rptid="2" name="test v1k"/></span></td>
<td><span><R:report metaSource="rptdb" rptid="3" name="test v1k"/></span></td>
</tr>
</table>
</html>
```

High productivity tool: The above lines of Right Reporter Infrastructure code shown above are equivalent to a hundreds of lines written in most other programming language.

Simply Savvy Reporting
