

Reporting At Your Fingertips – For Developers & End-Users Alike

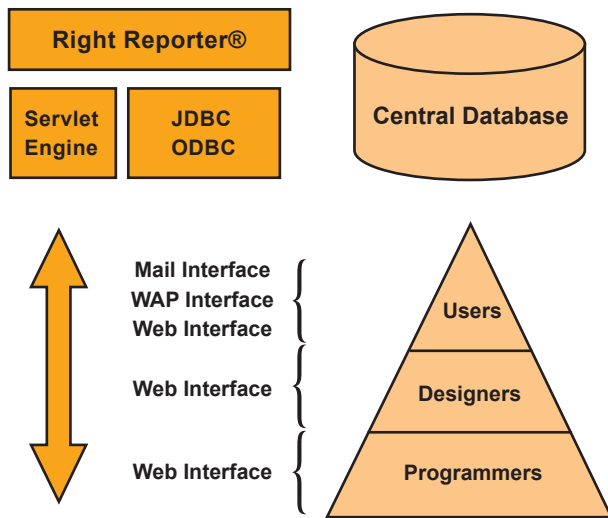

Reporting is a key need in all organizations today – whether they are large or small corporations or non-profit organizations. Key for tracking, funding, generating and following up on sales and more, reporting is usually a time-consuming and tedious process requiring the IT department to get involved in designing, creating and printing each report. Furthermore, many such reporting applications need additional hardware and software, resulting in greater costs and straining scarce IT resources.

With Avman's Right Reporter, organizations no longer need to take the expensive, time-consuming route. The flagship web-based tool now offers a range of versions for techies and end-users alike. With a series of libraries that reduce the developments time and cost of reports, its intuitive interface belies the complex drill-down reports it is capable of. These can be set up within minutes with the Right Reporter installation taking less than five minutes.

Features of Right Reporter®

- > Automatically generates reports in HTML
- > Users can design, run and view reports on the web using any commercial browser like Netscape or Internet Explorer
- > Creates reports within minutes
- > Variety of report styles and formats available including Standard, Executive, Label, Excel, PDF
- > Can be run on any wireless PDA
- > Multiple sort keys and runtime selection criteria
- > Allows report scheduling and e-mail results
- > Folders to group reports
- > Security to limit access to reports
- > Installs on server only – no additional licensing and cost issues
- > Protects data and reports by assigning security groups
